

GLOBAL PRIME

Indices Product Specifications

01.

Indices

Global Primes Indices allow traders to take a view on the world’s largest and most important futures and stock markets without trading the underlying product. Indices such as the DJIA index (US30) represent a basket of the 30 largest companies listed on US stock exchanges. Traders across the world will always know the value of the S&P500 and DJIA in order to understand the current market sentiment, e.g. risk on or risk off, bullish or bearish, am I a buyer or seller.

Dividend

Dividend adjustments occur on cash market CFDs when one of its underlying constituents’ stocks goes ex-dividend. When this happens, a long position will earn the dividend while a short position will pay the dividend. Buy trade - client trades are credited with the change in number of points multiplied by the trade size. Sell trade - client trades are debited with the change in number of points multiplied by the trade size.

Finance Charges

A financing debit or credit will be applied to a cash market indices position held overnight (00:00 server time). Finance adjustments are not made on CFD futures Indices. Financing charges for cash market Indices are derived from a relevant benchmark in interest rate of the market, plus a spread. The overnight finance charge is visible in the platform or on the website so you can determine you overnight charges per lot in advance. Financing charges are x3 on Fridays to account for the weekend.

General Product Specification

Product Specification	VFSC	ASIC Retail
Stop Loss - Minimum Order Distance	Zero	Zero
Pending Orders - Good 'till Cancelled (GTC)	MT4	MT4
Scalping Allowed	YES	YES
Margin Call	120%	120%

Note:

- Margin requirements and leverage are subject to change

HOT TIPS

- ✔ Contract size for all Cash Index CFDs is 1 i.e. 1 lot = 1 x quoted price.
- ✔ All Indices are priced in the currency of the underlying exchange. See Currency column in table.
- ✔ To view specifications in MT4: right click any product in Market Watch, select Specification.
- ✔ Quoted currency, margin currency and swap currency are all titled "Currency" in the table above.
- ✔ All buy/long trades enter via the Ask price and exit via the Bid. All sell/short trades enter via the Bid and exit via the Ask.
- ✔ Stop Loss and Take Profit orders on Buy positions are triggered when the Bid price hits the order level; Stop Loss and Take Profit orders on Sell positions are triggered when the Ask price reaches the order level.
- ✔ MT4 chart candles/bars by default only display the Bid price. The Ask price can be added by right-clicking, selecting properties, and clicking 'show ask line'.

Calculating swap/financing fee

Swap charge = lot size x swap rate

eg. 1 lot long NAS100; long swap: -0.89.

1. NAS100 swaps are priced in USD (see Currency column in table)
2. Swap/financing calculation: 1 (lot size) x -0.89 (swap rate) =USD -\$0.89

eg. 4 lots long GER30; long swap: -0.64. Friday night.

- 1 GER30 is priced in EUR (see Currency column in table)
- 2 Swap/financing calculation: 4 (lot size) x -0.64 (swap rate) x 3 (triple swap Friday) =EUR -€7.68

Note:

- Triple swap (x3) applies on Friday night.
- Swap rates are visible in MT4: right click any product in Market Watch then select Specification.

Calculating position value

Position value = contract size x lot size x price

eg. Long 2 lots GER30 (current price: bid price 10371.60, ask price 10371.90); 1:100 leverage.

- 1 GER30 is quoted in Euros. All long positions enter via the ask price and exit via the bid.
- 2 Calculation: 1 (contract per lot) x 2 (lots traded) x 10371.90 (ask price) = EUR €20,743.80

Note:

- When entering sell/short positions, the bid price is used for the above calculation.
- Position value currency is determined by the underlying market. See Currency column in table.

Calculating margin requirement

Margin requirement = position value (contract size x lot size x price) x margin rate

eg. Long 2 lots GER30; current price: bid price 10371.60, ask price 10371.90; 1% margin rate.

Position Value

1. GER30 is quoted in Euros. All long positions enter via the ask price and exit via the bid.
2. Calculation: 1 (contracts per lot) x 2 (lots traded) x 10371.90 (ask price) = EUR €20,743.80

Margin Requirement

1. Margin requirement: EUR €20,743.80 (position value) x 1% (margin rate) = EUR €207.45
2. If trading account is not EUR, margin will be converted automatically to account currency.
